## PERSONAL RESUME

Coding a world-class website its always been my passion like thinking and learning to build a delightful and scalable web application. As a professional coder, it is always no problem by using the most modern technology such as CSS library or JavaScript Library as a language for building web applications. In the future, I'm doing in-depth learning about how to create and animate 3D computer graphics to display in a web browser. While going deeper into the world-class website developer, I'm doing learning about Artificial Intelligence and Computer Vision things.

## EDUCATION
